

# COMMON RAVENS

have a similar intelligence  
to that of 7 year olds.

Let's see how **YOUR** logic skills compare!  
Try your best to solve the following **logic puzzle**.

The winners of The Bird Show have just been announced. Can you match the name of each prize-winning bird with its breed, age, prize placing in the contest and the name of its owner?

## CLUES

1. Kaylee's bird is either two years older or two years younger than the bird that took first prize at The Bird Show.
2. The parakeet is owned by one of the women.
3. Simon is older than Zoe's bird.
4. The parrot (which isn't five years old) took second prize in the competition.
5. Malcom's bird finished in a higher position than the canary.
6. Derrial isn't the three-year-old bird.

# Chart it out!

Check off each box you know the statement is true. Mark an x in each box you know the statement to be false.

	BREED			AGE			PRIZE			OWNER		
	Canary	Parakeet	Parrot	2 years	3 years	5 years	First	Second	Third	Malcolm	Kaylee	Zoe
Inara												
Derrial												
Simon												
Malcolm												
Kaylee												
Zoe												
First												
Second												
Third												
2 years												
3 years												
5 years												

**Did you know that logic is considered a type of science?**

Logic is a particular way of thinking, one that is reasonable and based on good judgment.

BIRD	BREED	AGE	PRIZE	OWNER
Inara				
Derrial				
Simon
